

The Chevy Volt Second Generation was released in 2016 with two versions; the LT and the Premier.

Details of the technical aspects can be found [here](#).

Standard Features

<https://www.edmunds.com/chevrolet/volt/2016/features-specs/>

The features of the Premier that the LT cannot get are multi level heated front seats, heated or multi level heated rear seats, leather seats, heated steering wheel, confidence package, auto parking, premium sound system and MyLink Radio with Navigation.

The LT can order cloth or leather “appointed” seats and a number of extras like floor mats, lighting, compass and better wheels. GM says the clock is optional but the user manual does not.

The LTs have "Apple CarPlay" which allows you to connect your phone to the car and have Google maps on your car. It's much better than the built in Nav because it's always updated and even has on the fly traffic alerts. It is activated by plugging your iPhone into the USB port and your apps will show on the display. If you have an Android phone, you can get Android Auto. Connect your phone to your car using a USB cable. Your phone might ask you to download or update certain apps, like Google Maps. Review the Safety Information and Android Auto permissions to access your apps. Turn on notifications for Android Auto.

OnStar offers WIFI for a fee that lets devices connect while in the car. It includes turn-by-turn navigation. This is for emergency directions. There is a fee for OnStar. The manual notes: **Selling/Transferring the Vehicle** Call 1-888-4ONSTAR (1-888-466-7827) immediately to terminate your OnStar services if the vehicle is disposed of, sold, transferred, or if the lease ends.

The English owner’s manual can be downloaded here. A separate manual is available for the MyLink option.
